

NEEDS

Do you have a view on how your bee keeping society can support and develop your bee keeping knowledge, education and productivity to help you create healthy and productive colonies of bees.

What you need to know

This is your chance to inform the 2019 education programme by telling us where the skills gap is to being a more competent bee keeper.

What you need to do

Simply answer the five questions outlined below adding comments to help us decide how our society can deliver new skills to all our members.

When you need to do it

Please can you reply by Friday 12th October so the education committee can start planning for a successful 2019.

Q1 - do you want a published club schedule of learning and development events for 2019?

Q2 - if yes, what subjects or topics would you like to be included?

Q3 - do you want to join a study group for basic assessment, modules or bee husbandry?

Q4 - would you want to support the delivery or administration of events, or become a mentor?

Q5 - what level is your bee keeping knowledge? beginner / intermediate / advanced

What happens next?

Send your replies via email to Trevor Smith at: trevorsmith_13@yahoo.com

The education team will take your replies into account and will look to accommodate the majority of your requests in a fresh approach to learning in 2019.

Thankyou

SS&DBKA Education Sub Committee - 041018
